OmniSource News Release

OmniSource Recycles for Hurricane Relief Efforts

Month-long promotion scheduled to raise money

Fort Wayne, IN, September, 2005. In a corporate-wide effort to raise money for Hurricane Katrina relief, OmniSource Corporation recently announced its plan to run a charitable promotion for the month of September. A penny for every pound of nonferrous retail material and a dollar for every ton of retail ferrous material purchased at the Company's retail locations will be donated to aid the victims of Hurricane Katrina.

This effort will give the public an opportunity to recycle scrap metal and assist in making a contribution to the devastation and suffering experienced as a result of Hurricane Katrina. Reflective of the company's core values – Perseverance, Respect, Caring, and Citizenship – this charitable promotion is another opportunity for OmniSource to assist others in their great time of need.

###

OmniSource has 35 locations and was named the largest ferrous and nonferrous recycler in the United States by "Recycling Today," a leading industry publication. Headquartered in Fort Wayne, IN, the company employs over 1,750 people and recently celebrated its 62nd year in business.
